

VMEbus Filler Panels

Standard Products Shown

Features

- ◆ Available in 3U, 6U and 9U heights (standard)
- ◆ Available in 4HP width increments through 84HP (1-21 slot widths)
- ◆ Custom heights and widths available upon request
- ◆ Alodine coated for maximum electrical conductivity and superior corrosion resistance (alodine is also known as chromate or iridite)
- ◆ Alodine specification and certifications: MIL-C-5541 (superseded by AMS-C-5541) and AMS-A-2470, Class 3 (Class 3 provides enhanced electrical conduction)
- ◆ Brushed cosmetic surface
- ◆ Custom sizes and cutouts are available - contact the factory

Overview

The complete line of Dawn's VMEbus filler panel assemblies is a perfect complement to standard Eurocard card cages and enclosures. These quality filler panels include all the related metric hardware and accessories.

Standard heights include 3U, 6U and 9U; standard widths include 4HP, 8HP and 12HP though other slot-width increments as well as fractional slot width sizes are available - contact the factory for more information.

Also available are custom versions which include apertures for connectors, LEDs, switches and other panel-mounted components.
